PAKISTAN MINERALS INVESTMENT FORUM 2026

Meet us at PMIF 2026

Start with a focused discovery discussion - not a premature commitment.

FROM FIRST CONVERSATION TO EVIDENCE-BASED CLARITY. PARTNER WITH PURPOSE. SCALE WITH EVIDENCE.

APAC SYSTEMS, Salman & Associates and Mineral Technologies, assist offshore mining companies and investors who have an interest in Pakistan, into a structured, defensible pathway, connecting commercial objectives with qualified local expertise, independent due diligence and coordinated socially responsible project delivery.

- **QUALIFY - Clarify your objectives, screen opportunities and identify critical evidence gaps.**
- **CONNECT - Map the right authorities, advisers, rights holders and delivery partners**
- **DELIVER - Progress test work, modular processing and site readiness under defined responsibilities.**

EXPLORATION- ESTABLISHMENT – OPERATIONS – SECURITY – ALL IN ONE

PAKISTAN MINERALS INVESTMENT FORUM 2026

Your Pathway from Interest to Implementation
A practical, staged approach for offshore clients pursuing opportunities in Pakistan.

WHAT APAC CAN COORDINATE

1. Entry brief & opportunity screening
Objectives, investment role, minerals, constraints and decision criteria.

2. Stakeholder & partner mapping
Credentialled local advisers, rights holders, authorities and delivery specialists.

3. Technical validation
Representative sampling, testwork, process definition and design basis.

4. Modular project delivery
Supplier-approved processing packages, logistics, site integration and commissioning support.

5. Operational readiness
Training, communications, monitoring, spares and lifecycle support.

WHY CLIENTS SHOULD ENGAGE APAC

1. One coordination interface
2. A structured route across commercial, technical and local delivery workstreams.
3. Decision gates, not sales pressure
4. Proceed, pause or decline as new evidence is established.
5. Local participation with accountability
6. Defined responsibilities, transparent commercial terms and capability transfer.
7. Fit-for-purpose scope
8. Equipment and delivery plans shaped by ore characteristics, infrastructure and project readiness.
9. Responsible project controls
10. Integrity, rights, environmental, community and safety issues are treated as release conditions.
